Sample Session-Review Package

The Stoic Gambler — Built for Slots. Written for Your Accountant.

SAMPLE ONLY. *Every name, figure and fingerprint below is synthetic and shown so accountants can evaluate the format before recommending it to clients. It is not a real client record and is not tax advice.*

3. Gross wins and losses (stated separately)

Measure	Amount
Sessions with a net gain	$3,070.00
Sessions with a net loss	$1,870.00
Net for period	$1,200.00

4. Handpay register

The W-2G flag is applied only to a single win of $2,000 or more, the slot threshold for payments made in calendar year 2026. Session totals never trigger it. In this sample, one handpay is flagged (2026-02-02, machine 5531-B, $2,500.00) and should reconcile to a W-2G from the payer.

5. Record integrity

Each session is hash-chained to the one before it and time-sealed when written. The fingerprint shows when an entry was written and that earlier entries were not altered afterwards. It corroborates the client's diary; it does not prove the underlying facts and does not replace your own review.

6. What the accountant decides

Filing status (casual or professional), the loss-deduction treatment that applies for the tax year, and any reconciliation to casino win/loss statements remain the preparer's and client's decisions.
